## Foreword

We at ELM Computer Systems Inc. would like to thank you for using AvanTax eForms.

It is thanks to suggestions from our clients, both new and returning, that eForms has become the quality product that it is today.

Thank you!

# **Headings for Import Files**

# 1 Headings for Import Files

## eForms Standard & Enterprise Only

Column headings are used by the import function to identify the information in the column; the keyword "NULL" can be used as the heading of any column you wish the import to ignore. You may also enter "NULL" into the first cell of any row (column A) if you wish the import to ignore that entire row. If data exceeds the maximum size of a field, an error message will be given and the import process will be halted. Where applicable, default data that will be used if a field is empty (or not represented in the import file); these values are listed in the Comments & Examples column in **bold** print. The various formats used are described below:

- **Text** - Text fields may contain letters, numbers, spaces and punctuation. In some cases, they must be in upper case (such as Province, Postal and Country codes); otherwise, mixed case is acceptable.
- **Yes/No** - Yes/No fields contain logical data and consist of "Y", "1", "Yes" or "X" for "Yes"; "N", "0", "No" or leave the field blank for "No."
- **Currency** - Currency fields contain dollar amounts and are formatted either in dollars and cents or in dollars only. If no decimal value is entered a whole dollar amount will be assumed.
- **Numeric** - Numeric fields may only contain numbers; either integer or decimal. The number of decimal places will be specified if applicable.

See **Import from Excel File** and **Import from CSV File** for sample import file layouts. Excel templates have been installed with eForms and can be accessed via the **TOOLS > IMPORT / EXPORT DATA > OPEN EXCEL TEMPLATES** menu. The Excel import templates also contain a sheet with sample data as an example of how data on the sheets should be entered.

Cell A1 (import from Excel) or the first data element (import from CSV) must contain a heading defining the type of data to import. The table below shows the appropriate heading for each form included with eForms (click on any form for detailed heading information):
